The Makinex Powered Hand Truck PHT-140, previously known as the OneLIFT, is a universal materials handling solution that enables one person operation to safely lift and load small equipment or bulky goods weighing up to 140kg (309lbs). It provides a quick and easy alternative to using a forklift or tailgate loader for small loads.

The Makinex Powered Hand Truck has many applications and can be used in workshops, warehouses, factories, depots and distribution companies.

The Makinex Powered Hand Truck features powered lift via a 12V 25 Amp linear actuator. It is easy to operate – the lifting arm reach is controlled by the user lifting or lowering the handles and arm height is controlled via a simple thumb switch.

The unique design enables one person operation to lift and load directly into vehicles (trucks, vans, utes and cars) or to place equipment and small loads on bench tops. It eliminates awkward and dangerous one or two person lifts and reduces the incidence of back and other injuries caused by heavy lifting.

The Makinex Powered Hand Truck is lightweight and easy to manoeuvre. After use it can be folded down flat for easy transport and storage.

The Makinex Powered Hand Truck comes standard with a Hook attachment for lifting, moving and loading small equipment and machinery fitted with a lifting eye, e.g. water pumps, generators, air compressors, plate compactors etc.

A Fork attachment for lifting, moving and loading small pallets and skids is also available.
